Programming	Client Side	Methodologies	Tools	Server Applications
C#, HTML	JavaScript	Agile Project Development	Visual Studio 2015	Microsoft SQL Server 2014
CSS3	JQuery	Domain Driven Design	Microsoft Test Manager	Microsoft Azure
ASP.NET MVC 5	JSON, AJAX	Object Relational Mapping	Pivotal Tracker	Windows Server 2012 R2
Twitter Bootstrap	D3	Continuous Integration	SQL Prompt (Redgate)	
NHibernate 4		Continuous Deployment	TFS 2012, Git	
Chrome Dev Tools		Design Patterns, Refactoring	VMWare 10	
Nuget, Moq		Asynchronous Programming		
		Dependency Injection		

## Experience

### July 2015 - Current **I.T. Intern (Architecture Group)**

*ZirMed, Inc. - Comprehensive end-to-end solution platform for Revenue Cycle and Population Health Management*

- Engage in all aspects of application life cycle management for a database health monitoring system at a software-as-a-service (SAAS) firm
- Utilize Agile methodologies on a five person team to design and implement an application under the supervision and guidance of a Managing Architect
- Present weekly sprint reviews and demonstrations to stakeholders including the Director of Architecture and Chief Technology Officer
- Collaborate with Infrastructure and DevOps professionals regarding security protocols and feasibility across multiple environments
- Regularly refactor and optimize the code base across all distributed architecture while following accepted best practices
- Apply Design Patterns such as Domain Model, Repository, Dependency Injection, and Factory for code consistency
- Develop an understanding of Object Relational Mapping as a data access pattern and implement it using NHibernate 4
- Collaborate with peers to enhance our skills and improve our developer tool kit

### Dec 2014 - Current **Business Development Associate**

*Sound Barrier LLC (Startup) - Produces sound concealment tips, tricks, and information hunters are able to use while hunting, currently working on first product launch*

- Design, develop, and maintain soundbarrierhunting.com across all platforms
- Optimize a web presence to integrate with social media accounts in order to gain a following and create a company reputation
- Use Adobe Illustrator and Photoshop to manage branding and deliver content on our social media accounts
- Create product design models and mockups in AutoCAD 2015
- Apply entrepreneurial background to investor relationship management and organizational networking

### Jan - May 2015 **Software Quality Assurance Analyst (Co-op)**

*The Rawlings Group - A leading insurance subrogation and Worker's Compensation firm in the United States*

- Create test plans, test scenarios and test cases that ensure appropriate testing of system modifications and enhancements
- Communicate with users, developers, managers, teammates, and technical support staff to understand issues and requirements, as well as to share information such as testing techniques and results
- Evaluate and interpret business requirements to develop test cases and suggest improvements to suggested design
- Identify/document software defects and data issues, prioritize issues based on risk and impact, and verify corrections
- Create or query to locate test data necessary to conduct tests, use a team based tool to track defects, and provide both oral and written status

## Education

Fall 2015	B.S.B.A. Computer Information Systems: Web Development, Information Security
	Minor: Entrepreneurship GPA 3.14
	University of Louisville, Louisville, KY

## Activities

2014 IdeaStateU Business Concept Team Winner - *PocketParkU*
