Programming	Client Side	Tools	Methodologies
C#, HTML 5	Javascript, JQuery	Visual Studio 2015	Agile Project Development
HTML 5, CSS 3	JSON, AJAX	Microsoft Test Manager	Domain Driven Design
ASP.NET MVC 5	D3	Pivotal Tracker	Object Relational Mapping
Twitter Bootstrap		SQL Prompt (Redgate)	Continuous Integration
NHibernate 4	Server Applications	TFS 2012, Git	Continuous Deployment
Chrome Dev Tools	Microsoft SQL Server 2014	VMWare 10	Design Patterns, Refactoring
Nuget, Moq	Microsoft Azure		Asynchronous Programming
	Windows Server 2012 R2		Dependency Injection

Education and Certification

Fall 2015 B.S.B.A. Computer Information Systems: Web Development, Information Security
Minor: Entrepreneurship
University of Louisville, Louisville, KY
GPA: 3.14

Work Experience

July 2015 - Current **I.T. Intern (Architecture Group)**

ZirMed, Inc.

- Engage in all aspects of application life cycle management for a database health monitoring system at a software-as-a-service(SAAS) firm
- Utilize Agile methodologies on a five person team to design and implement an application under the supervision and guidance of a Managing Architect
- Present weekly sprint reviews and demonstrations to stakeholders including the Director of Architecture and Chief Technology Officer
- Collaborate with Infrastructure and DevOps professionals regarding security protocols and feasibility across multiple environments
- Regularly refactor and optimize the code base across all distributed architecture while following accepted best practices
- Apply Design Patterns such as Domain Model, Repository, Dependency Injection, and Factory for code consistency
- Develop an understanding of Object Relational Mapping as a data access pattern and implement it using NHibernate 4
- Collaborate with peers to enhance our skills and improve our developer tool kit

Dec 2014 - Current **Business Development Associate**

Sound Barrier LLC (Startup)

- Design, develop, and maintain soundbarrierhunting.com across all platforms
- Optimize a web presence to integrate with social media accounts in order to gain a following and create a company reputation
- Use Adobe Illustrator and Photoshop to manage branding and deliver content on our social media accounts
- Create product design models and mockups in AutoCAD 2015
- Apply entrepreneurial background to investor relationship management and organizational networking

Jan - May 2015 **Software Quality Assurance Analyst (Co-op)**

The Rawlings Group

- Create test plans, test scenarios and test cases that ensure appropriate testing of system modifications and enhancements
- Communicate with users, developers, managers, teammates, and technical support staff to understand issues and requirements, as well as to share information such as testing techniques and results
- Evaluate and interpret business requirements to develop test cases and suggest improvements to suggested design
- Identify/document software defects and data issues, prioritize issues based on risk and impact, and verify corrections
- Create or query to locate test data necessary to conduct tests, use a team based tool to track defects, and provide both oral and written status

Activities

- 2014 IdeaStateU Business Concept Team Winner - *PocketParkU*
